

Nutriswiss quality standard

We guarantee the food-safe transport of all tropical oils and fats from their source right through to the customer (e.g. palm oil, laurics, shea butter, fractionated products).

A completely separate supply chain guarantees the origin of the product.

We ensure complete quality control, right across the entire supply chain.

And we guarantee social responsibility and a protected environment:

We know exactly where our raw materials come from and, thanks to direct and open contact with the plantations, we know how they are cultivated.
